

IN BOX BAGMAKER MS-L

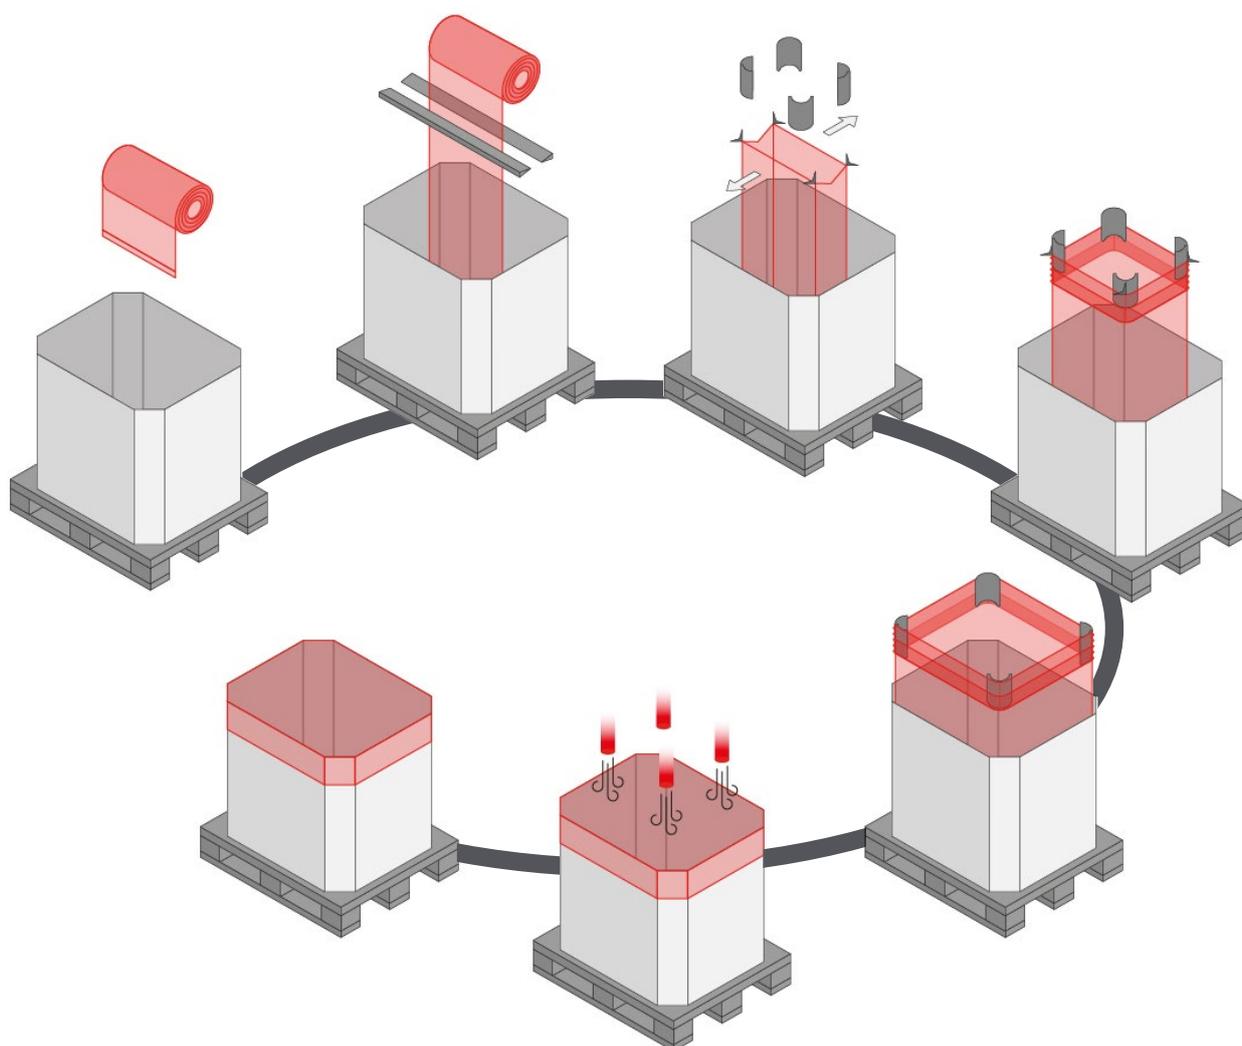

Technical Data

Container types	octabin, metal cages, goodpack, wooden crates wire mesh cages, cardboard boxes
Min. container size	L 800x W 800 H 800 mm
Max. container size	L 1400x W 1300 H 2000mm
Film type	tubular PE with side gusset
Film thickness	30÷150 µm
Film roll diameter (each)	max 1000mm
Film roll weight (each)	600Kg
Number of film reels	1÷3
Capacity	70 boxes/hr
Installed power	14.5 kW
Compressed air supply	6 bar
Air consumption	100NI/box
Touch Panel	Siemens TP700

Option
45° K sealer

THE PROCESS

The MS-L_S is a fully automated liner inserter, which from a reel of tubular PE film, tailor makes and inserts bags into every type of large size containers.

The MS-L is capable of working with octabins, metal cages, goodpacks, wooden crates, wire mesh cages, cardboard boxes all with variable heights and footprints.

Manual insertion of the bag inside a large box is always very challenging as it is difficult for the operator to position the bag evenly inside the container.

MS-L bagmaker automatically unwinds the film of the desired length, cuts it and positions it perfectly inside the box thanks to the calibrated air blowers.

MS-L in box bagmaker is a state of the art packaging machine, capable of working with different container types with or without pallet, different footprints and variable heights.

It can be configured with up to 3 different film types to offer extreme flexibility in the box type and shape and an unbeatable production autonomy.

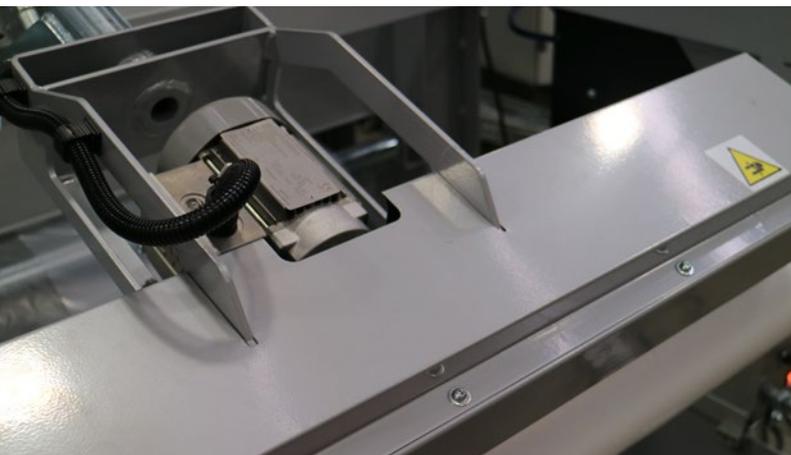

Film reel end integrated sensor
Automatically advises when the film is near the end of the reel

Flat bag in the box:
The calibrated air blowing system positions the bag flat on the bottom of the box

Up to three film reels
Capable of working with many box types and different footprints

Fail safe bag opening
Mechanical gripper and position clamps securely each bag in the right place

Motorized film reel
To work with all the film thicknesses

ONE FITS ALL

OCTABINS

METAL CAGES

GOODPACK

WOODEN CRATES

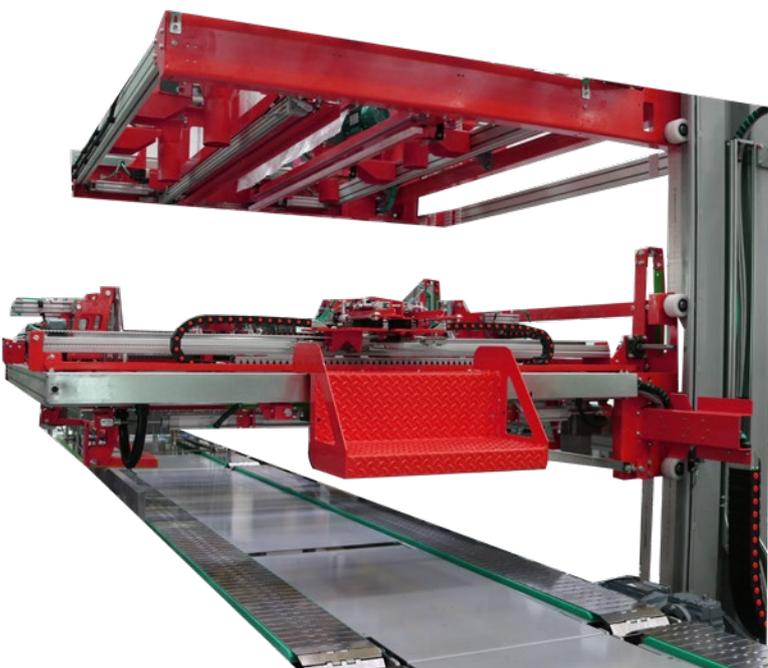

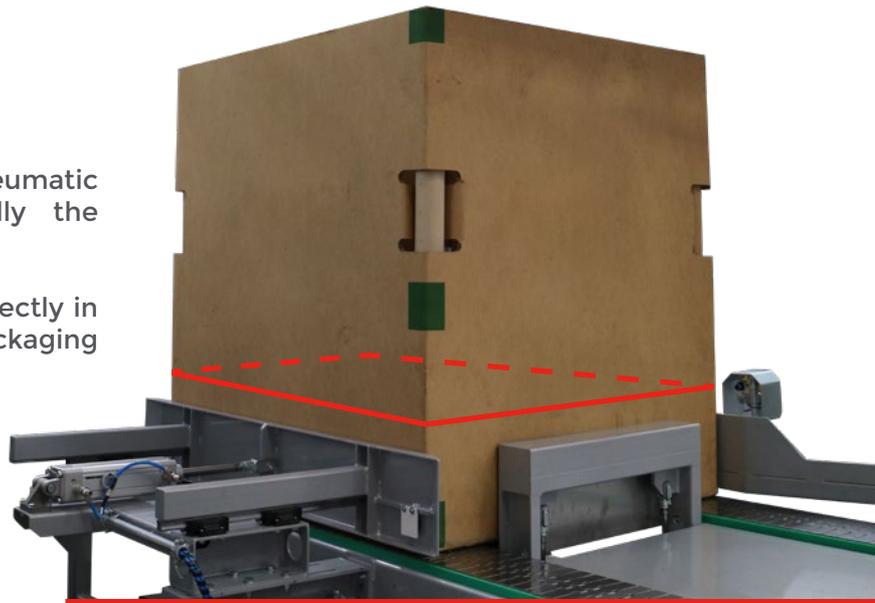

WIRE MESH CAGES

CARDBOARD BOX

The MS-L inbox bagmaker is equipped with a pneumatic centering device which aligns automatically the container in the middle of the conveyance line.

This device ensures that the bag is placed perfectly in centre of the container to have the upmost packaging results.

MS-L in box bagmaker has low maintenance requirements.

The lowerable head allows easy inspections and periodical adjustment at operator level for a safer working environment.

Based in the North of Italy, OFFICINA BOCEDI is one of the worldwide leader manufacturers of end of the line packaging systems. Bocedi complete product range includes stretch and shrink hood machines, conveyance lines, vertical and horizontal strapping machines , in box bagmakers and a multitude of customisable accessories to fit the most demanding packaging cycle.

The company has skilfully optimised its production using the over 55 years of worldwide experience on the market to design and to install state-of-the-art packaging solutions, tailored machines and packaging cycles to offer a turnkey and perfect fit system suitable for any type of product.
